

Edlund 625 APP Correctional Facility Can Opening System

Guard against missing can lids and costly lockdowns, with the first and only air-powered can opening system designed specifically for correctional facilities. Constructed of heavy duty stainless steel with tamperproof hardware, the 625 APP features a new, enclosed crown punch design and automatic lid-collecting system that makes it virtually impossible for prisoners to steal dangerous pieces of metal. Plus, at up to 10 cans per minute, it opens up a whole new level of efficiency for many facilities.

Originally designed and built for Rikers Island, NYC DOC, one of the largest security facilities in the USA

FEATURES:

- Built-in compressor
- Two lockable, programmable counters for accurate lid-to-can verification
- Reinforced, welded walls and doors, plus integral padlock latches
- Power lock-out key to prevent access to lid-counters and can-counters
- Quick-change tooling to accommodate different can sizes*
- Ability to open up to 10 cans per minute with one operator
- Heavy duty stainless steel construction with tamperproof hardware
- Lockable and height-adjustable casters

The 625 APP can be customized to fit any correctional facility's specific security needs.

Put a lid on loss. Take the security risk out of opening cans, with a can opening system you can count on.

Power lock-out key prevents unauthorized changes to lid-counter and can-counter settings

Reinforced, welded walls and doors, plus integral padlock latches securely protect the compressor and lid compartment

Air-powered, two-handed operation for added safety and security

Two lockable, programmable counters for accurate lid-to-can verification

625 APP NC

Open shelf design unit available without compressor for facilities with an existing air supply

ADDITIONAL FEATURES INCLUDE:

- Fully enclosed compartment with a built-in compressor
- Wash down to IP-65 standard
- Quick-change tooling to accommodate different can sizes*
- Ability to open up to 10 cans per minute with one operator
- Heavy duty stainless steel construction with tamperproof hardware
- Programmable relay counter
- Lockable and height-adjustable casters
- Made in U.S.A.

*Short cans require custom tooling.
